PROFILE SUMMARY

Artificial Intelligence and Data Science student with strong interest in software engineering, intelligent automation, and data-driven systems. Skilled in Python, SQL, and IoT technologies with experience developing real-world applications using ESP32, Firebase, and cloud platforms. Passionate about building scalable software solutions and applying AI to solve real-world problems.

PROJECTS

Smart Parking System | AI + IoT Personal Project

Oct 2025 - Dec 2025

Tech Skills - Python, ESP32, Firebase, Sensors, HTML, CSS

- Developed an IoT-based parking system to monitor parking slot availability in real time.
- Implemented ultrasonic sensors with ESP32 to detect vehicle presence.
- Integrated Firebase cloud database for dynamic parking status updates.

Intelligent Patient Onboarding System | Smart Healthcare Personal Project

Jan 2026

Tech Skills - Firebase, OCR, Web Dashboard

- Developed a digital hospital onboarding system for faster patient registration.
- Implemented QR-based ticket generation and queue management.
- Integrated OCR document scanning for automatic patient data entry.

Data Analytics Dashboard Personal Project

Jan 2025 - Present

Tech Skills - Python, Pandas, Matplotlib

- Built a data analytics dashboard using Python, Pandas, and Matplotlib.
- Processed datasets and generated insights through data visualization.
- Created charts and reports to analyze trends and patterns.

EDUCATION

B.E – Artificial Intelligence and Data Science, Sri Sairam Engineering College,
Chennai 2024 – 2028

Higher Secondary Education, Dawn Matric Higher Secondary School, Dharmapuri
2017 – 2024

CERTIFICATION

1. Python Programming Certification
2. IoT Fundamentals
3. Web Development Basics

ACHIEVEMENTS

- Developed multiple IoT-based automation systems addressing real-world challenges.
- Built smart monitoring and energy optimization solutions using embedded systems.
- Continuously exploring AI-driven technologies and software development practices.
